

# HAVE YOU BEEN TO GREECE?

In the country where...

in the name of public order and safety,  
cops beat, imprison and torture migrants in  
detention centers–hellholes, like Petrou Ralli.

migrants, fleeing from their land, if they  
manage to cross the borders, paying  
trafficking rings, they face fascist violence in  
the name of racial purity.

migrants are part of military exercises of  
refoulment for the reinforcement of the  
national ideal and the galvanizing of the  
national backbone.

the institutional legality of their documents  
is based on European directions of  
demographic delimitation, defined by states  
and capital.

migrants are instrumentalised according to  
the “needs” of the economy and all kinds of  
croft owners in Manolada.

the concentration camps fit as many bodies  
as can actually be managed by NGOs and  
housing funds that profit from European  
capital

it is planned that the condition of entry  
for male migrants will be based on their  
capability for seasonal work for 9 months, in  
terrible conditions for the bosses.

**Against the instrumentalisation of migrants  
and the exploitation by states and bosses.  
Let’s attack every authoritative mechanism  
that spreads fear and impoverishment.  
Let’s create communities of solidarity  
for the persecuted of this world.**
